

CARAVELLE
Powerboats

2002

Since building the first Caravelle boat over 35 years ago, our commitment to producing quality boats remains the same. From the first layer of gelcoat to the last stainless steel fastener, a Caravelle powerboat is built to the highest standards to provide you with dependable, lasting performance and value. There's more. We also design and build into each boat just the right mixture of strength, beauty, energy and vitality. A Caravelle boat is more expressive, exciting and rewarding to own. We have a passion for designing and building great boats. It shows in each model we create. You can see it in the styling. You can feel it in the performance. You owe it to yourself to experience the excitement of a Caravelle Powerboat.

sport cabin

Sport cabin interior

Dash shown with color-coordinated bezels.

The Interceptor 260 Sport Cabin will impress you from the moment you step aboard. The Caravelle V24 Offshore Hull cuts through rough water and offers an amazingly smooth, dry ride. The cockpit features a full fiberglass liner and U-shaped bench seat with plenty of storage space. The generous cabin provides a full galley with a sink, stove, hanging locker and a portable marine head. You're set for the day with the Interceptor 260 Sport Cabin.

Optional drop-out bolster seat provides comfort and convenience.

One look at an Interceptor and you know you're in for something special

The Interceptor 212 Bowrider is sure to satisfy the thrill seeker in you. This boat, simply put, is a pure kick to drive. The Interceptor 212 features the Caravelle XPV hull: it has an extended running surface - for quick planing ability and minimum bowrise during takeoff, a Pad bottom - for maximum top-end speed, and a deep V hull - for a smooth ride.

Easy to read gauges feature stylish chrome bezels.

Extra wide floor storage with aluminum lid that accommodates skis and wakeboards.

It's no secret. You like a boat that's "small on the outside" so you can easily trailer it, maneuver it and store it in your garage. Yet, you want a boat that's "big on the inside" so you have plenty of room for friends and gear. That's the concept that inspired our design team to produce the impressive 186 Bowrider. Measure our interior space against the competition and you'll discover that all 18 footers are not created equal.

When you're serious about fishing

Devout fisherman need a boat they can rely on. The 180 and 190 are great choices. Easily maneuverable in shallow water, both are terrific bay boats with self-bailing cockpits, large casting platforms, insulated fish box, aerated bait well, carry-on cooler and high speed pick-up.

Better materials make better boats

Our one-piece stainless steel windshield supports provide strength and stability.

Give your boat a protective edge with a heavy-duty rubber fabric that protects against bumps and scrapes better than aluminum rivets.

MoldCore, a light-weight synthetic honeycomb material, features a strong, light-weight foundation for the fiberglass floors featured in several models.

Caravelle seating is built on lightweight plastic shells and bases that shed water and dry fast. All cushions are fastened with stainless steel staples for rust-free wear.

The skin coat of fiberglass is applied with AME 5300 resin, a low-ester blended resin with the best blister resistance in the marine industry.

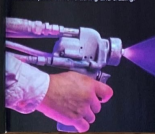

Cleats, ski lows, and other stress related hardware are made of stainless steel and through-bolled with locknuts.

Stainless bow rails are welded, through-bolled and strategically placed for safety and convenience.

Our premium UV-resistant gelcoat guards against yellowing, fading and chalking and reduces potential for cracking and crazing.

We use 100% Kynlex Fiberglass, a multi-directional material with greater strength to weight ratio than woven roving because less resin is absorbed.

Our fiberglass stringer system is foam-filled for excellent support and durability. Closed-cell foam flotation, standard on every Caravelle boat, enhances safety and sound-dampening.

Our upholstery is made from heavy-duty stitched-back upholstery with UV and mildew inhibitors to keep it looking new.

All powerplants are installed with precise measurements for optimum performance.
